Topic document

Prepared using the supplied project instructions for “Import Data using Transform Maps”. The steps and expected behavior below are based on the supplied source document and templates. Actual execution results must be added after testing in ServiceNow.

Risks

Incorrect header names or field types; source-to-target mapping mistakes; missing privileges; accidental duplicate insertion if Coalesce is not configured; incomplete validation; reports grouped by the wrong field.

Mitigations

Review headers and field maps before Transform; verify the target table; test with a small sample; confirm the Coalesce field and setting; inspect transform history; run and save each report.

Checklist – data

[ ] Spreadsheet has a header row. [ ] Required five columns exist. [ ] Sample rows are reviewed.

Checklist – configuration

[ ] Employee Test table and fields exist. [ ] Employee Import import-set table exists. [ ] Transform Map source/target are correct. [ ] Field mappings are confirmed.

Checklist – validation

[ ] Transform completes. [ ] Target records are checked. [ ] Coalesce is tested with repeated IDs. [ ] New and changed rows are verified.

Checklist – analytics

[ ] Department pie chart saved. [ ] Location bar chart saved. [ ] Employee list report saved. [ ] All three are added to the dashboard.
