Topic document

Prepared using the supplied project instructions for “Import Data using Transform Maps”. The steps and expected behavior below are based on the supplied source document and templates. Actual execution results must be added after testing in ServiceNow.

Platform

ServiceNow platform, using its table, Import Set, Transform Map, reporting, and dashboard capabilities.

Input format

Excel spreadsheet (.xlsx), prepared from a Google Spreadsheet or equivalent spreadsheet editor.

Staging

ServiceNow Import Set table labelled Employee Import; the platform auto-populates its name as u_employee_import in the source instructions.

Target table

Employee Test, technical name u_employee_test.

Transformation

Transform Map named Sample Spreadsheet Import; Auto Map Matching Fields and Mapping Assist are used to configure mappings.

Data integrity

Coalesce configured on a field map to match existing employee records and reduce duplicates.

Analytics

ServiceNow Reports: pie chart by Department, bar chart by Location, and list report; dashboard named Employee Analytics Dashboards.

Dependencies

Valid ServiceNow login, appropriate privileges, source spreadsheet, and access to relevant modules.
